ChartLogic showcases Document Management capabilities at AAOS

EMR industry leader offers digital enterprise solution for physician practices

San Diego, February 13, 2007 - ChartLogic, a leader in the Electronic Medical Records (EMR) industry, will showcase its newly launched ChartLogic® Document Management capabilities at the American Academy of Orthopaedic Society's Annual Meeting at the San Diego Convention Center, Feb. 14 – 16, 2007.

ChartLogic Document Management is a comprehensive tool for transforming a practice into a paperless environment. ChartLogic Document Management enables efficient, secure, HIPAA-compliant digital storage of all documents and images. It can operate as a stand-alone system for the office or as an integrator of other systems such as ChartLogic® Electronic Medical Records and ChartLogic® Practice Management.

Digital documents can be accessed from any Internet-ready device, including desktop computers, laptops or tablet PCs. Taking advantage of the latest .Net programming technology and hacker-proof encryption, ChartLogic Document Management users can login to view critical documents at the hospital, office, home, or even from the car or golf course.

ChartLogic Document Management is scalable to meet the needs of a single-physician practice to a large corporation and can grow as a practice grows — no additional hardware is required.

ChartLogic Document Management's Application Service Provider (ASP) architecture enables a low cost of ownership in addition to hassle-free implementation and deployment. Document Management keeps data safe with redundant backups and secure data centers.

ChartLogic Vice President of Marketing Tim Barrett said the launch of ChartLogic Document Management enables ChartLogic to offer the enterprise digital office solution for today's orthopaedic physicians. ChartLogic EMR, practice management, patient education and IT services help practices makes a seamless transition from paper charting to an electronic practice.

"Document Management allows physician practices and our clients to upgrade to an EMR without a complete system overhaul," Barrett said. "With our software, users can seamlessly integrate EMR with their existing medical software, allowing a physician to view important health information through the EMR with the patient in the exam room."

Key features of ChartLogic Document Management include:

- **Document Storage:** View same document or image simultaneously from multiple computers; access documents from any Web-enabled device and from multiple sites.
- **Document importation:** Batch scan, import and capture documents from devices.
- **Document Workflow:** Streamline practice communication and medical decision making processes by using practice-defined workflow decision tree.
- **Security:** Latest encryption technology ensures sensitive medical data is safe and secure.
- **Improve productivity:** Reduce costs associated with managing and storing paper charts; workflow document routing and automated tasks, rapid scanning, and indexing ensure limited staff overhead needed to manage scanning process. Integration with ChartLogic EMR and medical devices reduces duplication of data entry.
- **Low cost of ownership:** Internet-based ASP architecture ensures low cost of ownership.

###

About ChartLogic

Based in Salt Lake City, Utah, ChartLogic is a Healthcare Information Technology (HIT) company focused specifically on the physician practice. ChartLogic is a clear leader in the Electronic Medical Records market with more than 1,500 physician licensers and 5,000 total users.

ChartLogic has evolved beyond being best of breed in EMR and now provides fully integrated, total office solution for physician practices, enabling them to achieve significantly higher levels of patient care, efficiency and profitability. This total solution provides physicians with an answer to their increasing economic pressures such as higher costs and lower reimbursements and lets them return to their primary interest – the practice of medicine.
