

DOCTOR IMPRESSES REFERRING PHYSICIANS

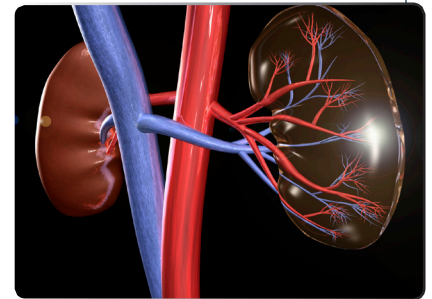

Practice Profile

Dr. Akhil Das
 Urology
 ChartLogic user since 2002
 1 Physician
 7 Technicians
 2 Locations
 5 Workstations
 Practice founded in 2000
 100% of referral reply letters completed with ChartLogic Precision Voice™

POSITIVE REVIEWS RING TRUE

Dr. Das began researching Electronic Medical Record systems for his practice in 2002. During his search, he came across several impressive reviews for ChartLogic and decided he needed to see the system for himself. He immediately recognized that ChartLogic would be ideal for his needs as a Urologist. The ability to use voice recognition was an important part of his decision and he found that ChartLogic satisfied that need.

Dr. Das made the decision to implement ChartLogic into his practice and was extremely pleased with the local ChartLogic team that completed his installation and training. “Our account manager worked very closely with us to make certain the system was running properly and that we

were well trained,” said Dr. Das. “That was very important because we knew we wouldn’t use the system if we didn’t feel completely comfortable with it.”

BETTER WORK ENVIRONMENT

“One of the best things that has come out of implementing ChartLogic into my practice is a more relaxing work environment,” said Dr. Das. “It’s much easier to enter the information on my own time and not worry about dictating or waiting on transcription services.” Dr. Das currently uses a tablet and his PC to enter information into his electronic patient charts. He has voice recognition when he needs it, but he utilizes other methods of data entry that ChartLogic provides as well.

PRAISING REFERRAL REPLY

Automated referral/reply letters have been the most beneficial feature for Dr. Das. “Being able to immediately respond to my referring physicians has made ChartLogic invaluable to my practice,” commented Dr. Das. “The physicians that refer their patients to me really appreciate immediate responses regarding their patients. They feel confident that I’m providing their patients with excellent care and hopefully, in turn, will refer more patients to me.”

THINNER CHARTS = LESS STORAGE

Dr. Das’ practice is enjoying more open space, due to a diminishing need for paper chart storage. Since a large portion of patient information is electronic, all patient charts are thinner and much easier to store. His staff is more efficient because patient information is electronic and easily accessible through ChartLogic, reducing the time of pulling and sorting through paper charts.

The Net Result

- Decreased Transcription Costs
- Decreased Paper Chart Storage
- Decreased Overhead
- Increased Staff Productivity
- Increased Referrals

“Being able to immediately respond to my referring physicians has made ChartLogic invaluable to my practice.”
